EDUCATION

Ladoke Akintola University of Technology

Bachelor of Technology in Civil Engineering

Ogbomosho, NG

Jan. 2020 – Nov 2025

EXPERIENCE

Frontend Engineer

Jan 2024 – Dec 2025

Konn3ct

Remote

- Architected and shipped 80%+ of a social platform from the ground up as the founding frontend engineer, owning end-to-end delivery across authentication, real-time chat, event management, and interactive mapping for 2,000+ users.
- Built a real-time chat system with WebSocket integration, implementing threaded replies, message pinning, optimistic UI updates, and lazy-loaded image galleries with performance-optimized rendering for fast load times.
- Designed authentication-aware UI flows with role-based access control, conditionally rendering admin features and permission-sensitive functionality across the platform.
- Implemented backend services using Node.js and Express.js for message workflows, media endpoints, and event management, integrating tightly with frontend data-fetching patterns for seamless end-to-end delivery.
- Built and maintained a typed React component library enforcing strict TypeScript patterns, consistent error states, and loading behaviors, improving code quality and development speed across the codebase.

Frontend Engineer

Jun. 2023 – Dec. 2023

Builderz

Remote

- Built and maintained responsive web applications for early-stage startups using React, Next.js, and TypeScript, implementing state management with Redux and consuming backend APIs.
- Collaborated with cross-functional teams including designers and backend engineers to ship products from initial prototype to production deployment.
- Maintained code quality through code reviews and testing to support fast iteration across multiple concurrent projects.

Frontend Engineer

Dec. 2022 – May 2023

Alkaios Technologies

Lagos, NG

- Streamlined client-side data architecture on a multi-tenant property listing platform by collaborating on API design, resulting in more efficient frontend queries and faster UI rendering.
- Collaborated with developers to refine the first-time user journey, resulting in an immersive landing page experience that streamlined the path from discovery to account creation.

Frontend Engineer

Oct. 2021 – Sept. 2022

Nsexpress Digital Limited

Lagos, NG

- Implemented SEO best practices, including metadata optimization, keyword research, and website structure optimization, to improve search engine visibility.
- Focused on front-end optimization with responsive design, improving user interaction and reducing bounce rate by 10%.

Frontend Developer

Mar. 2021 – Oct. 2021

Senderful

London, UK

- Developed accessible web platform for an organization supporting children with special needs using React.
- Collaborated closely with a designer to translate Figma mockups into pixel-perfect, responsive UI components with a focus on intuitive user flows and accessibility.

Frontend Developer

Apr. 2020 – Feb. 2021

Nicholas Clift & Associates

Penzance, UK

- Built an architect's portfolio website using Next.js with scroll-triggered animations, lazy-loaded image galleries, and performance-optimized responsive layouts.

PROJECTS

Aura Auction – (Monad Blitz Hackathon) | *Next.js, TypeScript, Solidity, wagmi* Mar 2026

- Built an on-chain premium auction platform on Monad testnet with proxy auto-bidding and anti-snipe timer extensions, implementing the smart contracts in Solidity with Hardhat and a Next.js frontend wired to the chain via wagmi and viem.
- Designed real-time bid state synchronization between contract events and UI, handling optimistic updates, transaction lifecycle states, and reorg-safe event reconciliation for a responsive bidding experience.

Stryde – (Solana Mobile Hackathon) | *React Native, Expo, Typescript* Jan 2026 – Mar 2026

- Developed a GPS-powered fitness app in React Native with TypeScript, implementing real-time activity tracking, local-first data architecture with Zustand and AsyncStorage, and background sync pipelines.
- Integrated Solana Mobile Wallet Adapter for on-device wallet authentication and \$SKR token claim transactions.

Xepho LMS – <https://xepho.io/> | *React, Next.js, Typescript* Jun 2024 – Dec 2024

- Architected and deployed a modern, accessible web interface for Xepho, optimizing user's journey to streamline lead generation and brand discovery.

Bigjara – <https://www.bigjara.com/> | *React, Next.js, Typescript, Framer Motion* Feb 2024 – Mar 2024

- Collaborated with the product team to define and execute a modern landing page for Bigjara, implementing performance optimizations that boosted SEO visibility and drove a 30% lift in user engagement.

SKILLS

Languages: TypeScript, JavaScript

Frontend: React, Next.js, React Native, Redux, Zustand, Tailwind CSS, Framer Motion, Jest, React Testing Library, Vite, GSAP, HTML5, CSS3

Backend: Node.js, Express.js, MongoDB, PostgreSQL, WebSockets, REST APIs

Web3: Solana Web3.js, Solana Mobile Wallet Adapter

Developer Tools: Git, Cursor, Claude Code, Android Studio, Figma
